Total Patients: 331 | Total Brands: 30 | Coverage: 331/331 patients (100.0%)

2 Key Findings

- **Market Leader:** esoral mups dominates with 99 patients (29.9% market share)
- **Top 3 Brands:** esoral mups, esrgel 20mg, and exium mups 20mg account for 55.3% of all prescriptions
- **Gender Distribution:** Most brands show female predominance except for specialized cardiac medications
- **Symptom Patterns:** Low back pain is the most commonly treated symptom across multiple brands
- **Market Concentration:** Top 10 brands cover 85.5% of all patients
- **Long Tail:** Bottom 15 brands (ranks 16-30) represent only 6.6% of total prescriptions

3 Market Share Analysis

3.1 Tier 1 Brands (>10% market share)

Table 2: Tier 1 Market Leaders

Brand	Patients	Market Share	Cumulative Share
esoral mups	99	29.9%	29.9%
esrgel 20mg	53	16.0%	45.9%

3.2 Tier 2 Brands (5-10% market share)

Table 3: Tier 2 Significant Players

Brand	Patients	Market Share	Cumulative Share
exium mups 20mg	31	9.4%	55.3%
Pantonix 20mg	24	7.3%	62.6%
maxorc 20mg	21	6.3%	68.9%

3.3 Tier 3 Brands (1-5% market share)

Table 4: Tier 3 Moderate Players

Brand	Patients	Market Share	Range
canalia 30mg	14	4.2%	Ranks 6
Dexilene 30mg	11	3.3%	Ranks 7
lansol 30mg	10	3.0%	Ranks 8
othera 20mg	9	2.7%	Ranks 9
rabe 20mg	8	2.4%	Ranks 10
esonix 20mg to Maxorc 20mg	6-4	1.8-1.2%	Ranks 11-15

4 Gender Distribution Patterns

Table 5: Gender Distribution by Brand Category

Category	Total Patients	Male %	Female %
Top 5 Brands	228	40.8%	59.2%
Brands 6-15	81	48.1%	51.9%
Brands 16-30	22	31.8%	68.2%
Overall	331	42.3%	57.7%

5 Statistical Summary

- **Total Patient Population:** 331 patients
- **Total Brands Analyzed:** 30 (representing 100% coverage)
- **Market Concentration:** Top 5 brands control 68.9% of the market
- **Gender Distribution:** 57.7% female, 42.3% male
- **Brand Diversity:** Wide range from 99 patients (top) to 1 patient (bottom)
- **Specialty Medications:** Several brands target specific conditions (cardiac, pregnancy, etc.)

6 Methodology

This comprehensive analysis examined brand distribution patterns across 331 patients using the complete dataset. All 30 most prescribed brands were analyzed for patient count, market share, gender distribution, and primary symptoms treated. The analysis provides insights into market dynamics, brand positioning, and prescription patterns in the healthcare dataset.
