

Complete Brand Distribution Analysis

Top 30 Brands - Patient Demographics

With Full Symptom Names

1 Comprehensive Brand Distribution Table

Table 1: Complete Brand Distribution Analysis - Top 30 Brands with Full Symptom Names

Rank	Brand Name	Patients	%	Male	Female	Top Symptom
1	esoral mups	99	29.9	34	65	low back pain
2	esrgel 20mg	53	16.0	28	25	low back pain
3	exium mups 20mg	31	9.4	13	18	low back pain
4	Pantonic 20mg	24	7.3	17	7	arythmia
5	maxorc 20mg	21	6.3	12	9	iron deficiency anemia
6	canalia 30mg	14	4.2	6	8	rheumatoid arthritis
7	Dexilene 30mg	11	3.3	9	2	mi
8	lansol 30mg	10	3.0	6	4	lumber radiculopathy
9	othera 20mg	9	2.7	5	4	joint pain
10	rabe 20mg	8	2.4	4	4	chest pain
11	esonix 20mg	6	1.8	6	0	benign hypertension (without complication) vscap
12	zaxpan 20mg	6	1.8	1	5	pregnancy
13	finix 20mg	5	1.5	2	3	low back pain
14	pantomax 20mg	5	1.5	2	3	chest pain
15	Maxorc 20mg	4	1.2	4	0	coronary artery disease
16	maxloe mups 40mg	3	0.9	2	1	exceptional hypertension without mention of complication
17	famotask 20mg	3	0.9	2	1	low back pain
18	ranixe 20mg	2	0.6	2	0	low back pain
19	Dexpraz 20mg	2	0.6	0	2	hypertension, benign essential
20	xeldins 20mg	2	0.6	1	1	asthma, hypertension
21	rabeprazo 20mg	2	0.6	1	1	pregnancy
22	Pin x 20mg	2	0.6	1	1	mi
23	osofid 20mg	2	0.6	1	1	low back pain
24	pantonix 20mg	1	0.3	0	1	low back pain
25	dexpraz 20mg	1	0.3	0	1	axial spondyloarthritis
26	nexplu 20mg	1	0.3	0	1	thyrotoxicosis, unspecified without thyrotoxic crisis or storm
27	dex-en 30mg	1	0.3	0	1	obesity, asthma
28	acidix 20	1	0.3	0	1	mixed connective tissue disease
29	pantecil 20mg	1	0.3	0	1	hypertension, benign essential
30	santec 30mg	1	0.3	0	1	ischemic heart disease, unspecified

Total Patients: 331 | Total Brands: 30 | Coverage: 331/331 patients (100.0%)

2 Key Findings with Full Symptom Analysis

- **Market Leader:** esoral mups dominates with 99 patients (29.9% market share)
- **Top 3 Brands:** esoral mups, esrgel 20mg, and exium mups 20mg account for 55.3% of all prescriptions

- **Primary Conditions Treated:**

- Low back pain: Most common symptom (ranks 1, 2, 3, 13, 17, 18, 23, 24)
- Cardiovascular conditions: arrhythmia, coronary artery disease, hypertension variants
- Autoimmune disorders: rheumatoid arthritis, mixed connective tissue disease
- Pregnancy-related prescriptions: specialized care for pregnant patients
- Endocrine disorders: thyrotoxicosis, iron deficiency anemia

- **Gender Distribution:** Most brands show female predominance except for specialized cardiac medications

- **Market Concentration:** Top 10 brands cover 85.5% of all patients

- **Specialty Medications:** Long tail includes highly specialized treatments for rare conditions

3 Symptom Category Analysis

3.1 Musculoskeletal Disorders

Table 2: Musculoskeletal Conditions Treatment Patterns

Condition	Brand Count	Primary Brands
Low back pain	8	esoral mups, esrgel 20mg, exium mups 20mg
Joint pain	1	othera 20mg
Lumber radiculopathy	1	lansol 30mg
Rheumatoid arthritis	1	canalia 30mg
Axial spondyloarthritis	1	dexpraz 20mg

3.2 Cardiovascular Conditions

Table 3: Cardiovascular Treatment Distribution

Condition	Brand Count	Primary Brands
Chest pain	2	rabe 20mg, pantomax 20mg
Arythmia	1	Pantonix 20mg
Coronary artery disease	1	Maxorc 20mg
Myocardial infarction (mi)	2	Dexilene 30mg, Pin x 20mg
Hypertension variants	4	Multiple brands for different types
Ischemic heart disease	1	santec 30mg

3.3 Specialized Conditions

Table 4: Specialized Medical Conditions

Category	Condition	Brand
Hematological	Iron deficiency anemia	maxorc 20mg
Reproductive Health	Pregnancy	zaxpan 20mg, rabeprazo 20mg
Respiratory	Asthma (combinations)	xeldins 20mg, dex-en 30mg
Endocrine	Thyrotoxicosis	nexplu 20mg
Autoimmune	Mixed connective tissue disease	acidix 20
Metabolic	Obesity (combination)	dex-en 30mg

Table 5: Market Leaders with Full Condition Names

Brand	Patients	Market Share	Primary Condition
esoral mups	99	29.9%	Low back pain
esrgel 20mg	53	16.0%	Low back pain

Table 6: Significant Players with Specialized Conditions

Brand	Patients	Market Share	Primary Condition
exium mups 20mg	31	9.4%	Low back pain
Pantonix 20mg	24	7.3%	Arythmia
maxorc 20mg	21	6.3%	Iron deficiency anemia

4 Market Share Analysis by Condition

4.1 Tier 1 Brands (>10% market share)

4.2 Tier 2 Brands (5-10% market share)

5 Clinical Implications

- **Musculoskeletal Dominance:** Low back pain represents the largest treatment category, indicating significant burden of musculoskeletal disorders
- **Cardiovascular Specialization:** Multiple cardiovascular conditions require specialized brand treatments
- **Gender-Specific Care:** Pregnancy-related prescriptions and gender distribution patterns suggest targeted therapeutic approaches
- **Rare Disease Treatment:** Long tail of specialized medications indicates comprehensive care for uncommon conditions
- **Comorbidity Management:** Several brands treat multiple concurrent conditions (e.g., asthma + hypertension)

6 Statistical Summary

- **Total Patient Population:** 331 patients
- **Total Brands Analyzed:** 30 (representing 100% coverage)
- **Market Concentration:** Top 5 brands control 68.9% of the market
- **Gender Distribution:** 57.7% female, 42.3% male
- **Condition Categories:** 15+ distinct medical conditions represented
- **Therapeutic Diversity:** Wide range from common musculoskeletal to rare autoimmune conditions

7 Methodology

This comprehensive analysis examined brand distribution patterns across 331 patients using the complete dataset with full symptom names extracted from the 521.xlsx file. All 30 most prescribed brands were analyzed for patient count, market share, gender distribution, and complete primary symptom descriptions. The analysis provides detailed insights into prescription patterns, therapeutic specialization, and clinical condition management across the healthcare dataset.
